

MASON COUNTY BOARD OF COUNTY COMMISSIONERS

UPDATED PERMIT ACTIVITY REPORTS

DECEMBER 17, 2015

The Permit Activity Reports furnished to the Board of Commissioners over the past two years have reflected a monthly comparison of the current year with the past year (e.g. October 2014 total compared to October 2015 total). These reports did not provide a year to date total of permit activity as a comprehensive illustration of building and planning activity. During a recent budget workshop some of the October totals were read into the record as yearly totals instead of the monthly totals they actually were. To rectify this and prevent any confusion in the future, the Activity Reports have been changed to show Year to Date totals. Unlike the monthly comparison, these Reports provide an overview of the applications received by the Department for review and processing over the course of the entire year.

The attached November report shows that activity has actually increased by 3% over 2014, while the number of staff has remained fairly constant. The level of expertise, primarily in the building division, has made some significant changes affecting the Department's overall ability to process permits at an optimal level. Three senior level Building Inspectors have left and three junior level inspectors have been hired. Their abilities improve every day; however, the way the Department reviews building plans and conducts inspections has had to change.

Fire Code Compliance – In the absence of a Fire Marshal, a past Building Inspector IV obtained the required certifications to enforce Fire Code compliance and perform Fire Code inspections. The Mason County Code requirement for qualified inspectors is a current certification in either the 2012 International Fire Code - IFCI Company Officer Fire Code Inspector Certification, or the International Fire Code - Fire Inspector I Certification, and evaluation/approval by the Mason County fire marshal. At this time the Department has no qualified inspectors or a Fire Marshal, and has engaged the services of a qualified individual from Fire District #2. He works part time, one day a week.

Commercial Plan Review – Shortly after the departure of the above Building Inspector, the Department's Lead Plans Examiner retired. This individual was the only remaining building division staff member with the knowledge and experience to perform plan review at the commercial level. Attempts to replace both the Lead Plans Examiner and the Inspector IV have been unsuccessful and the Department has entered into three separate contracts for Building Services from outside consultants. This has allowed the Department to keep up with the commercial application activity; however it impacts the applicant by reduced access to the person reviewing the application, and impacts staff by reduced access to the reviewer's notes and building plans. Training for new Inspectors is being scheduled for after the first of the year to enhance their abilities in both residential and commercial plan review.

Permit Center Activity – The Reports also show the amount of customer activity on a monthly basis compared to the previous year. As of November of 2014, the Permit Center had 6,852 visitors; as of November of 2015 the Permit Center has had 7,216 visitors – this is a 5.3% increase over last year. Over the course of a normal day, on average, the Permit Center has 4 customers per hour – each customer requires anywhere from 15 minutes to 2 hours of assistance.
