

# **On-site Septic Homeowner Operation and Maintenance Report**

(To be used only for Conventional Gravity, Conventional Pressure, Sand Filter, Bottomless Sand Filter and Mound Systems)

## Tax Parcel Number: \_\_\_\_

## Property Address: \_\_\_\_

The following is a list of items that must be monitored and maintained to protect against failure of your on-site septic system. Inspection frequency is every three years for gravity and every year for all other system types. Please complete this form and return it to Mason County Public Health to comply with WAC246-272A-0270. You may also submit online at: https://masoncountywa.gov/health/environmental/onsite/homeowner-oandm-report.php

Homeowners are allowed to inspect the following system types. Indicate your septic system type and circle your answers to the relevant sections below, providing comments as needed.

□ Gravity Drainfield □ Pressure Drainfield □ Sand Filter □ Bottomless Sand Filter □ Mound

# General Site & System Conditions: (All Systems)

Components accessible for service:Yes / NoAll required service performed (if no - specify omitted inspection items in notes):Yes / NoSurfacing effluent from any component (including mound seepage):Yes / NoComponents appear to be watertight - no visual leaks:Yes / NoImproper encroachment (structures/impervious surfaces):Yes / NoAll riser lids securely fastened upon departure:Yes / NoElectrical repairs needed. If YES describe in comments:Yes / NoInspected components appear to be in good physical condition:Yes / NoRoot intrusion on any components. If YES describe in comments:Yes / NoSettling problems observed. If YES describe in comments:Yes / NoThe house/structure was vacant or used infrequently, assessment of the drainfield was not possible.Yes / No	The general Site and System Conditions were:	Fully inspected / Partially Inspected / Not Inspected		
Surfacing effluent from any component (including mound seepage): Yes / No Components appear to be watertight - no visual leaks: Yes / No Improper encroachment (structures/impervious surfaces): Yes / No All riser lids securely fastened upon departure: Yes / No Electrical repairs needed. If YES describe in comments: Yes / No Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	Components accessible for service: Yes / No	0		
Components appear to be watertight - no visual leaks: Yes / No Improper encroachment (structures/impervious surfaces): Yes / No All riser lids securely fastened upon departure: Yes / No Electrical repairs needed. If YES describe in comments: Yes / No Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	All required service performed (if no - specify omitted inspection items in notes): Yes / No			
Improper encroachment (structures/impervious surfaces): Yes / No All riser lids securely fastened upon departure: Yes / No Electrical repairs needed. If YES describe in comments: Yes / No Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	Surfacing effluent from any component (including mound seepage): Yes / No			
All riser lids securely fastened upon departure: Yes / No Electrical repairs needed. If YES describe in comments: Yes / No Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	Components appear to be watertight - no visual leak	ks: Yes / No		
Electrical repairs needed. If YES describe in comments: Yes / No Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	Improper encroachment (structures/impervious surfaces): Yes / No			
Inspected components appear to be in good physical condition: Yes / No Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	All riser lids securely fastened upon departure:	Yes / No		
Root intrusion on any components. If YES describe in comments: Yes / No Settling problems observed. If YES describe in comments: Yes / No	Electrical repairs needed. If YES describe in commen	ts: Yes / No		
Settling problems observed. If YES describe in comments: Yes / No	Inspected components appear to be in good physica	l condition: Yes / No		
	Root intrusion on any components. If YES describe in	n comments: Yes / No		
The house/structure was vacant or used infrequently, assessment of the drainfield was not possible. Yes / No	Settling problems observed. If YES describe in comments: Yes / No			

# Septic Tank: (All Systems)

This component was:	Fully inspected / Partially Inspected	/ Not Inspected	
Effluent level within operational limits (if NO explain in comments): Yes / No			
All required baffles in place (N/A = No baffles required): Yes / No / N/A			
Compartment 1 Scum accumulation (Inches, if other specify):			
Compartment 1 Sludge accumulation (Inches, if other specify):			
Compartment 2 Scum accumulation (Inches, if other specify):			
Compartment 2 Sludge accumulation (Inches, if other specify):			
Pumping recommended:	Yes / No		

## Distribution: D-Box (Gravity only)

This component was:Fully inspected / Partially Inspected / Not InspectedD-Box in good condition:Yes / NoD-Box outlets set to allow equal effluent distribution:Yes / No

### Drainfield: (Gravity only)

This component was:Fully inspected / Partially Inspected / Not InspectedComponent appears to be functioning as intended:Yes / NoPonding present? If YES explain in comments.Yes / No

#### Pump Tank: (Pressure Drainfield, Sand Filter, Bottomless Sand Filter, and Mound)

#### Pump: Effluent Pump (Pressure Drainfield, Sand Filter, Bottomless Sand Filter, and Mound)

This component was:Fully inspected / Partially Inspected / Not InspectedControls functioning:Yes / No

#### Panel: Alarm- High Water (Pressure Drainfield, Sand Filter, Bottomless Sand Filter, and Mound)

This component was: Fully inspected / Partially Inspected / Not Inspected Alarm mechanism functioning as intended: Yes / No

#### Drainfield: (Pressure Drainfield, Sand Filter, Bottomless Sand Filter, and Mound)

This component was:Fully inspected / Partially Inspected / Not InspectedPonding present? If YES explain in comments.Yes / No

#### Media Filter: (Mound only)

Slope integrity maintained: Yes / No

#### Media Filter: (Sand Filter only)

Ponding present? If YES explain in comments. Yes / No

#### Comments:
